Kamela,

Here is the list of laws that CBP needs waived for fencing. Laws in red are a MUST, while those listed in black may be imperative to have waived in certain geographical areas. Please note that we do not advocate a limited waiver of only the laws in red. Also, we are compelled to reiterate that our strong preference is to have a broad waiver authority that would allow the Secretary to waive any legal requirement in order to ensure expeditious construction of the fence. The more limited the waiver in terms of number of statutes, the greater the possibility that an unwaived law will delay construction, increase construction costs, and result in litigation. Such limitations will slow CBP's ability to meet the border security benchmarks outlined in the bill.

That said, here is the list:

The National Environmental Policy Act (Pub. L. 91-190, 83 Stat. 852 (Jan. 1, 1970) (42 U.S.C. 4321 et seq.)), the Endangered Species Act (Pub. Kamela,

Here is the list of laws that CBP needs waived for fencing. Laws in red are a MUST, while those listed in black may be imperative to have waived in certain geographical areas. Please note that we do not advocate a limited waiver of only the laws in red. Also, we are compelled to reiterate that our strong preference is to have a broad waiver authority that would allow the Secretary to waive any legal requirement in order to ensure expeditious construction of the fence. The more limited the waiver in terms of number of statutes, the greater the possibility that an unwaived law will delay construction, increase construction costs, and result in litigation. Such limitations will slow CBP's ability to meet the border security benchmarks outlined in the bill.

That said, here is the list:

The National Environmental Policy Act (Pub. L. 91-190, 83 Stat. 852 (Jan. 1, 1970) (42 U.S.C. 4321 et seq.)), the Endangered Species Act (Pub. I'm working on this blurb. Any help you can give on edits and how many miles of reinforced fencing we would need to complete to get to 700 miles? I'm guessing we would not count all of the 651 miles as reinforced fencing?

- **700 miles of reinforced fencing.** CBP defines "reinforced fencing" to mean single-layer fencing (typically 18ft tall, not the older chain-link or landing mat fence) with reinforced steel designed to be both a vehicle barrier as well as a persistent impedance to pedestrians.

Today, there is 651 miles of fence, including approximately 350 miles of single-layer pedestrian fencing of which 282 meets or come close to meeting the reinforced steel design standard and 36 miles of double-layer fencing build with chain link/expanded metal or landing mat. Of the 651 approx. 300 miles is the vehicle fence design .

Achieving 700 miles of reinforce fencing is expected to cost approx. \$4B

The duration to replace the 68 miles of chain link and landing mat pedestrian fence and to complete replacement of 300 miles of vehicle fence with reinforced steel pedestrian fence will take approx. 18 -24 months assuming we have the waiver.

And here's the information as of December 7, 2007 (it's the best I can do quickly and if you're looking to be able to make a comparison, you're better off with late 2007 since we started significantly building in 2008). Will that work?
